

Magertron™

Your governance framework, enforced.

Systems Integrator Partner Program. You write the controls. Magertron™ enforces them on every agent call.

YOUR BILLABLE PRACTICE

- 1 Readiness assessment.** Inventory the client's agents and MCP servers, and map the risk.
- 2 Deployment.** Helm install on their clusters, wired to their identity provider (Okta, Entra, Ping).
- 3 Control design.** Your framework turned into roles, tool permissions and approval flows, managed as code with Terraform.
- 4 Compliance evidence.** Map the audit trail to the client's SOC 2 and internal controls.
- 5 Ongoing assurance.** Quarterly control reviews and managed operations, billed as a retainer.

PARTNER TERMS

10–20%

Referral fee on first-year license

20–30%

Resale margin on deals you close

\$0

Free tier for your lab and client demos

1:1

Founder-led enablement and joint demos

Deal registration protects the opportunities you bring.

WHAT ENFORCES YOUR FRAMEWORK

Per-tool access control

RBAC down to each MCP tool, with SSO, SCIM and MFA for privileged accounts.

Delegated identity

OAuth dynamic registration and token exchange, so agents act as the user, not as a shared service account.

Complete audit trail

Append-only record of every tool call and every refusal.

Drift detection

Flags when an MCP server's tools change underneath you.

Cost control

Metering, contracts, budgets and throttling for each server.

Runs inside their boundary

Kubernetes-native, self-hosted and air-gap capable. Benchmarked at 16,000 rps with 10 ms p99 latency.
